

## 2008 - Vehicle Guide CO2 g/km

You can use the following list to estimate the CO2 g/km for your vehicle. This list is based on current models available in the Irish Market. This list is not exhaustive and does not include some older models – we are in the process of updating our calculators to improve usability and also include a database of older vehicles and we hope to have this online in the coming weeks.

These figures are for indication purposes only - gco2 do not guarantee the accuracy of these figures so we advise you to contact your car retailer or manufacturer to get official emission figures for your vehicle.
